I have not received a weekly report from Don since June 27 -- I thought he must have stopped sending them. Since Carolyn is on vacation this week, could you please forward any that have come since then? Funny that I would get left off the distribution list suddenly --

Thanks Eva

I apologize for any confusion. I did not make clear that UXO Pro quickie notes were referencing AMEC's weekly reports sent out by Don Smallbeck. Please let me know if you have not received direct email release. I did not even look at distribution list, and Carolyn is out on vacation.

**Subject:** 2016-7-26 - Williams AFB - clarify site activities June 18 last daily uxo pro rpt site visit - ST012 SEE to EBR drilling -ed epa

But the first email in this chain indicates that there are activities currently ongoing and Steve has been on site - ?

Correct. June 18 was the last site visit due to budget constraints at the end of June and it was my understanding that they stopped onsite activities shortly thereafter.

I believe June 18 activity was the last UXO Pro daily site visit report. I will request Steve W. confirm.

I was not privy to the actual USAF/ADEQ/EPA conference call. But with respect to the feelings expressed during a subsequent EPA/ADEQ management meeting Thursday afternoon, July 21, 2016: For Site ST012 (fuel tank farm) release, EPA is leaning toward initiating an informal dispute notice. I believe the EPA timeline is to have a signed letter out before Aug. 2, 2016. The Draft Final EBR Work Plan (Addendum/Revision 2(?) to the RD/RA OU2 GW Remedy [AMEC doc dated about 3-15-2016]) is the primary document being disputed.

Wayne --

Thanks for the update. You had been sending us Steve's daily reports up until June 18 -- if you have more after that time, I would really appreciate receiving them.

So what was the outcome of last Wednesday's meeting with Angeles, Tina and Phil?

Eva

Wayne,

I don't know if you had a chance to look through the weekly reports yet, so here are some highlights from the last two reports:

EBR well UWBZ34, located on the SW corner, was re-drilled. There's no reason given for having to re-drill it; this well had some strong indications of LNAPL when they drilled it the first time.

The 7/1 report shows LNAPL in several CZ and UWBZ wells that are located on the perimeter of the respective treatment zones. UWBZ26 on the west side had 20+ ft of NAPL on 7/5 and 7/6.

LSZ14, which is on the NE corner of the site next to Sossaman Rd., had 21-ft of NAPL on 7/7.

Well W11 had 7-ft of LNAPL on 7/8

There are still 16 eductors that haven't been removed, so no information on those wells re NAPL
